1. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 7-8: the term "the permanent magnets" lacks antecedent basis.

In claim 5, line 3: the term "a deflection coil" renders claim vague since the same is already mentioned in the preamble.

In claim 5, lines 7-8: the term "the permanent magnets" lacks antecedent basis.

As to claim 5, from the context of entire claim 5, it appears that the claimed deflection coil does not have any structure. Note that the display device in the entire body of the claim constitutes a use limitation.

Claims 2-4 and 6-8 are necessarily rejected since they depend upon rejected claims.

2. Claims 1 and 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

3. Claims 2-4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Prior art of the record does not disclose applicant's claimed (a) deflection unit or (2) a color display device including a cathode ray tube including a display screen, means for generating at least one electron beam and the deflection unit for generating deflection fields for deflecting electron beam(s) across the display screen in two perpendicular directions (x, y) and having magnetic field-generating means at or near a display screen-facing end of the deflection unit for generating a magnetic field to reduce raster distortions, characterized in that permanent magnets of the of the magnetic field generating means are made of a material having a negative temperature coefficient for the magnetic remanence(B(G)), the magnets being provided with a compensating shunt to increase the temperature coefficient of the magnetic remanence.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
